Annexe B: Allocations des canaux

Les tableaux suivants présentent le numéro des canaux et les fréquences centrales utilisées pour les standards 802.11a et 802.11b/g. Notez que même si toutes ces fréquences sont dans les bandes sans licence ISM et U-NII, tous les canaux ne sont pas disponibles dans tous les pays. Plusieurs régions imposent des restrictions à certains canaux sur la puissance de rendement et l'usage intérieur/extérieur. Ces règlements changeant rapidement, vous devez toujours vous renseigner sur la réglementation locale avant de déployer votre équipement sans fil.

Notez que ces tableaux montrent la fréquence centrale pour chaque canal. Les canaux ont une largeur de 22MHz pour le standard 802.11b/g et de 20MHz pour le standard 802.11a.
